

# Note on the Draft Comprehensive Plan

This copy of the Draft Comprehensive is rough. The original plan I have been updating was split into separate documents by section which has caused issues with overall pagination. There are missing pages from the end of one section to the next as many graphs and photographs have been removed. When the Final Comprehensive Plan it is formatted in the final document all will be consistent and repagination will occur. So, when pages are “missing” don’t be alarmed, they were removed.

Any sections in **RED** are sections waiting for additional information from outside sources.

I think I have caught all of the errors, but after multiple passes to 200+ pages things do slip through. If you see an error, please make note and let me know at my Town email address: [transferstation@townofislesboro.com](mailto:transferstation@townofislesboro.com)
