TICK TESTING

Free Tick Testing Now Available

Our goal at Bay Area Lyme Foundation is to provide individuals with free, tick testing to determine whether a tick they have encountered is — an infected or uninfected tick. This program is not intended for clinical decisions or as a diagnostic tool. Tick testing will enable our scientists to compare past and potential future distributions of ticks in the area. Our hope is that by collecting this data, we may be able to predict where risk is highest. This program is not intended for clinical decisions or as a diagnostic tool.
